Application for Data Science Manager

Dear Hiring Manager,

I am interested in the Data Science Manager currently available in your organization. My educational background, work experience and continuous learning have provided me with a unique set of skills that make me a Data Scientist experienced in different domains. I can streamline the gathering, cleaning, modeling, analysis and visualization of large amounts of data to obtain valuable insights. Furthermore, due to my research background and analytical skills, I can adapt machine learning algorithms to the specific needs of a project.

I am very experienced with R and several of its packages, and have experience with the Python programming language. I am familiar with several statistics and machine learning techniques to build descriptive and predictive models, and, as a visual person, I can handle several tools to create visualizations and tell compelling stories with data.

I am a self-motivated person with great analytical and modeling skills due to my PhD in Chemical Engineering. I also have very good interpersonal skills that allow me to connect and collaborate with people effortlessly. Furthermore, I am a quick learner that can get up-to-speed with new methods, tools and concepts in a short time.

I'm looking forward to hearing from you.

Sincerely,

Carlos Felipe Alcala Perez
